

# **UNDERWATER CACHÉ**

## **UNOBTRUSIVE OPERATIONS**

Zodiac Milpro UNDERWATER CACHÉ solution is developed to meet the demanding requirements of military unobtrusive operations.

Its specific features give military users the capacity to hide their boat during the night/day infiltration phase of the operation, and to re-inflate it after the mission and exfiltrate.

Approved up to 25 m (14 fathom), Zodiac Milpro UNDERWATER CACHÉ equipment is designed with the expertise of Zodiac Milpro special operations experts to be tough and reliable. It can also be used for an underwater logistic platform.

Zodiac Milpro UNDERWATER CACHÉ can also be used to complement Zodiac Milpro AIRDROP and HELIDROP solutions, which allows operators the ability to hide their boat after air transportation and gives them the capability of worldwide unobtrusive operations.

It is highly recommended that operators attend a Zodiac Milpro Operational training team course in the proper and efficient use of the cache system to ensure maximum effectiveness and avoid potentially hazardous practices.

Following approved Zodiac Milpro operational and maintenance procedures ensures equipment life and system integrity.
