

WATERTIGHT BOW BAG

STORAGE

P/N Z3401

The Zodiac Milpro watertight bow bag is specially designed to be secured at the bow of a boat.

The bag access cover is fitted with an airtight zipper and an oral inflation/deflation device. By rotation this corrosion resistant valve, it is possible to adjust the negative or positive buoyancy of the bag by deflating or inflating it.

Four strong carrying handles allow the handling of this bag with its full content. Handles are integral part of a belt that goes around the whole bag, so as to distribute the load evenly. An adjustable rucksack type shoulder strap makes the bag comfortable in a back-pack mode, when laced through the top carrying handle and the two bottom strap loops.
